Super - Glads Only

Chas. E. F. Gersdorff
1825 North Capitol St.
Washington, D. C.

INTRODUCTION

To my patrons, my friends:

To those of you who have purchased bulbs of me, I again tender my thanks, and request a continuance of your patronage, with the assurance that not only will your orders receive immediate acknowledgment, but they will be so executed as to convey the thought that you are dealing with a friend. At time of shipment, proper notice will be sent you.

Since 1910 I have been testing and rating *Gladiolus*. As a result of these tests, I have gotten together a very fine collection; and as these tests continue, others are added from time to time. Ratings are given in most instances, as determined by my own scale. Eventually, when the work of converting these ratings over to the A. G. S. standards has been completed, they will be changed, and at this time it may be well to explain that when revised, those now rating 85 or better, will probably rate between 75 and 90, the latter range, with a few over 90 to be the new Super Glad class. Those carried not rated, met with my stamp of approval, as they were shown at the Rochester Show in 1926, on which ratings will be eventually obtained.

CULTURAL INSTRUCTIONS

You can do no better than follow the Cultural Instructions compiled by the American *Gladiolus* Society, a copy of which will be sent with each order if requested.

ORDERING INSTRUCTIONS

Order early that I may fill your order complete. No substitution without permission. If possible name a second choice, as stocks of some varieties are quite limited. REMEMBER, all my stocks are planted by May 15.

Prices are quoted prepaid, on blooming size bulbs, as large as the variety attains, except where noted.

I WILL MEET ANY PRICE REDUCTION ANY ORIGINATOR MAY MAKE DURING THE SEASON.

Remittance should accompany all orders, either by Money Order, Draft or Check; foreign orders by Money Order only. **ORDERS FILLED** in rotation as received, when weather permits. Shipments requested during freezing weather will be made only at the risk of the purchaser. **IMPORTANT**—write your name, address and order **PLAINLY**.

The figures in left hand column are the average percentage ratings attained in my test garden. The dates given with number of days mean that when planted the date mentioned, the variety may be expected to bloom in the number of days stated, though this time is not absolutely fixed. Extremely early planting delays the time from planting to blooming, by ten or more days depending on earliness of planting, and this time is shortened ten or more days by extremely late planting. It is fairly safe, if you desire to plant at the normal time, to deduct 10 days from time allowed to bloom, for plantings in April, and to add 10 days to this period for time allowed for plantings in June, in order to try to gauge your plantings to have blooms ready for an exhibition. Color class, refers to that adopted by the American *Gladiolus* Society for its exhibitions in order to simplify the judging of classes calling for particular colors—this should assist you likewise. In most cases descriptions are according to Ridgway.

Members of the American *Gladiolus* Society are entitled to a straight 5% discount from all their orders. Prices

quoted are per single bulb, and 12 of a kind may be had for the price of 10, unless otherwise noted, except in case of varieties marked Stock Limited which are net. All stock guaranteed healthy, and true to name, and any proving otherwise will be cheerfully replaced.

Tell me your troubles, if you have any.

.....

The following are choice sorts which met with my approval at the American Gladiolus Society's Exhibition in Rochester in 1926. I am sure these will rate high. I am to have the privilege of listing the 1926 Silver Trophy winner, when stock becomes available—Mary Frey. Watch for it.

AMEGLASO (John C. Davis). Stock Limited.....	\$100.00
A. G. S. rating 96. Pure cream white, 8 to 10 open. Color classes: white or cream, buff and flesh.
